

MSCA2020 Impact and Future Challenges

*Synergies between EHEA and ERA:
Human resources as and key element*

Cecilia Cabello

Chair ERAC Standing Working Group Human Resources & Mobility (SWG HRM)

Director Open Science & Internationalization of FECYT (Spanish Foundation for S&T)

Beyond 2020, a common agenda for ERA and EHEA should work towards three main goals:

- Supporting highly competent and socially responsible students, researchers, academics and higher education and research institutes' (HE&RI) professionals in Europe throughout their working life
- Achieving effective mobility of students, researchers, academics, and HE&RI professionals within, to and from Europe
- Creating more common human resources standards for HE&RI in Europe, and striving for a common European identity for students, researchers, academics and HE&RI professionals

Shared challenges: tools and ideas to facilitate links between ERA and EHEA:

- Supporting highly competent and socially responsible students, researchers, academics and professionals in Europe.
- Effective mobility of researches, academics, students and staff.
- Common standards for higher education and research institutions in Europe and building up a European identity for researcher, academic, student and staff.
- Inclusiveness in higher education and research.
